

TMK UPTM PF ET

PRO SERIES

Range: 4-1/2 – 13-5/8" / 114,3 – 346,08 mm

Unique Feature

- Hooked thread form
- Enlarged torque shoulder for high torsional capacity and increased compression performance

Thread Profile

- Hooked thread form increases tension strength and bending capacity
- Prevents thread jump-out
- Optimized thread profile offers robust galling resistance
- Reduced cross threading
- Fast, easy make-up

Metal-to-Metal Seal

- Cone and cone gas-tight seal
- Tested and validated under ISO 13679 CAL IV
-

Shoulder

- Maximized contact area at the pin nose and shoulder interface provide the connection with robust torque and compression capacity
- Additional sealing barrier
