

TMK UPTM SFII

PRO SERIES

Range: 3-1/2" – 16" / 89 – 406 mm

Unique Feature

- Patented ULTRA thread form
- Patented locking center-shoulder seal
- Strongest semi-flush connection
- Connection diameter approximately 3 – 5% greater than pipe body

Thread Profile

- ULTRA full contact thread form provides high connection efficiency
- Run-in and Runout threads maximize critical cross-sectional area
- Close fitting thread minimizes movement within the connection and transfer of load onto the seal and shoulder under compression
- Thread root and crest are parallel to the pipe axis which results in easy stabbing
- Optimized thread profile offers greater number of full threads for improved mechanical integrity under combined loads
- Reduced cross threading
- Increased bending capacity

Locking Center-Shoulder Metal-to-Metal Seal

- Optimized seal design for increased connection sealability envelope
- Two sealing surfaces for redundancy
- Retains connection driftability even when over-torqued
- Increased torque capacity
- Validated under ISO 13679 CAL IV
